Introduction

In University life, there are many students at many universities find it difficult to afford the original price of their required courses textbooks, meanwhile some others had graduated or finished the courses and do not use their books anymore.

Project Idea

We will build a web application aims to solve these problems, we called it Books station, It enables the users to create an account and with the same account the user can sell or buy university textbooks. So for the student or graduate student who don't need their books can offer them on the web. And make money. For the those who can't afford the original price can use our web to negotiate with the buyer on it, then choose to pick up the books or have them delivered.

Vision

The vision is to be the first choice for book trading among students and non-students. It is simplifying the process of finding university educational books (textbooks) at reasonable prices.

Mission

Books Station's mission is to be the most successful platform in the Kingdom of Saudi Arabia for university educational book trading among students and non-students. In doing so, Books Station will meet the student's needs by simplifying the process of finding university educational books (textbooks) at a reasonable price through a web application.

Objectives

Create a digital book trading platform

Grow used book sales

Prioritize reusing books

Offer competitive pricing

Shorten delivery and pick-up time

Reduce waste of used books
over the next year

Opportunities

1

Weak
competitors

2

Harnessing new
technology and
trends (Digital sales).
/ Migration to digital
resources.

3

Expand and
systematize
marketing efforts.

Threats

1

New rivals

2

Electronic books

3

Limited book
copies

Strengths

1

Highly needed

2

Saves students
time and money

3

Customer
experience, fast,
reliable and user
friendly

4

Minimize waste
of resources.

Weaknesses

1

Small
development
team

2

Limited funding

3

High advertising
budget

4

Limited copies of
books

Project Selection

the project was selected from 3 projects :

1: Bicycle reservation system

2: scan and convert to pdf application

3: Book selling application between students

The project was selected based on the following factors:

- 1) Guaranteed revenue: there is a high demand for books in the academic field, all students will utilize the application will cause the money to be reimbursed.
- 2) Time saving: it will speed up the process of finding material and selling/buying operations.

The project was selected based on the following factors:

3) Available funding.

4) the team acquires needed skills and experience.

5) reduce paper waste: students will not need to buy new books several times, graduate students can sell their old books instead of discarding them.

Project Charter

General project information

Project Name: Book station web application

Department Sponsor: King Abdulaziz university

Project Charter

Project Puerporse

It aims to facilitate university book trade between students and non-students with negotiable prices

Project Charter

Project Scope

Within Scope:

This project addresses all levels of academic soceity

Outside Scope:

Indiviuals who do not fall within the educational
academic community.

Project Charter

Project Risk

- The limited copies of each book may be insufficient to accommodate the needs(Med)
- The team can run out of budget during the implementation phase(Lo)

conclusion

Many students will be helped to succeed in their studies by using our web without spending a lot of money.

Thank you for listening ♡
